

Washington AFH/HCBS Data Availability Matrix

This matrix evaluates the public availability of key program-integrity data points required to operationalize the MN review-priority indicator typology in Washington State.

Data Category	Publicly Available?	Source / Location	Notes & Limitations
Facility Roster & Capacity	Yes	DSHS ArcGIS Portal (Residential Care)	Geocoded nightly extract. Requires deduplication to isolate current active licenses.
Medicaid Contract Status	Yes	DSHS AFH Locator	Contract types (e.g., AFH, Specialized Behavior Support) are published per facility.
Inspection & Complaint Counts	Yes (via scraping)	DSHS RCS Forms Portal	Public per facility (<code>AFHForms.aspx?lic=X</code>). Must be scraped to build structured datasets.
Enforcement Actions (Fines/Conditions)	Yes (via scraping)	DSHS RCS Forms Portal	Embedded in facility PDF folders ("enforcement letters"). Not published as a standalone structured dataset.
Program Spending Growth	Yes (aggregate)	OFM / DSHS Biennial Budget	High-level LTC spending is public: All-Funds rose from \$3.8B (2013-15) to \$10.44B enacted (2023-25) to \$13.07B proposed (2025-27, +25.2%). See <code>wa_data_aggregate/WA_LTC_Spending_Biennia.csv</code> for the full sourced series. Per-provider or per-recipient payment data is not public.
Provider Exclusions/Sanctions	Yes	HCA Termination List / LEIE	Downloadable lists exist, but joining them to the AFH roster is unreliable because facility names rarely match the licensee's legal/personal name.
Beneficial Ownership / Related Parties	No	WA SOS CCFS (Partial)	CCFS is bot-gated and only shows registered agents/governors. Full 42 CFR 455.104 ownership disclosures are not public.
Provider-Level Billing Data	No	HCA ProviderOne	Claims data (units, dates, overlapping hours) is strictly internal.
Oversight Audit Findings	Yes	WA State Auditor (SAO)	High-quality PI performance audits (2021, 2023) are public.

Public Records Request (PRR) Target List

To fully test the MN review-priority indicator typology, the following datasets must be requested from DSHS/HCA: 1. **Master Licensee Legal Name Crosswalk:** Mapping every AFH facility name to its exact legal licensee name and UBI number (to enable exclusion-list matching). 2. **Provider Ownership Disclosures:** The full related-party and beneficial ownership data collected under 42 CFR 455.104. 3. **Provider-Level Medicaid Payments:** Annual Medicaid dollars paid per AFH operator (to test RF-03 billing concentration). 4. **Enforcement Dataset:** A structured tabular export of all civil fines, stop-placement orders, and license conditions (to avoid PDF scraping).
